# TRADITION MEETS MODERNITY

THE JUNKERS A60

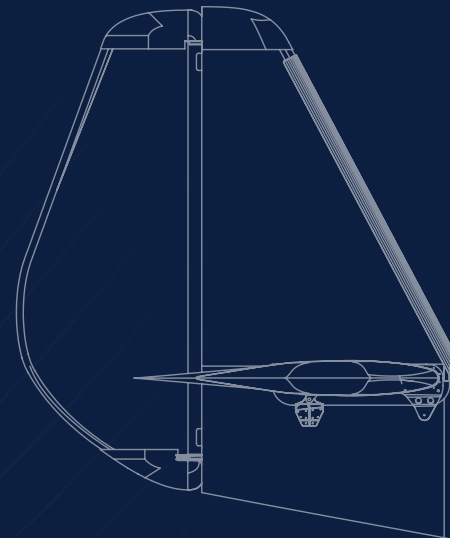

# THE MODERN INTERPRETATION OF A HISTORIC DESIGN

## THE JUNKERS A60 AIRCRAFT

With its innovative design, the Junkers A60 transports the aesthetics of the historic A50 sports aircraft into the modern age in a versatile and safe manner. The new cabin design with side-by-side seats has a closed canopy. This means that even on cooler days, sky flyers can take off.

In addition, the new technology makes flying even more fun and enhances the flying experience: The A60 has a newly developed retractable undercarriage that improves aerodynamics, increases flight speed and optimises flight behaviour.

Timelessly beautiful and excitingly modern:  
The Junkers A60 will inspire you!

## TECHNICAL DATA

Like its sister model, the Junkers A60 combines maximum lightness with powerful motorisation and state-of-the-art safety equipment. The ultra-light two-seater is equipped with the reliable Rotax 912 IS engine. The Garmin G3X Touch Flight Display technology offers modern cockpit functions and safe, precise flight control.

### GENERAL

Control	Dual Flight Controls
Propeller	MTV-34-1-A / 175-200
Passengers	1

### MOTOR & PERFORMANCE

Maximum speed	208 km/h / 112 kts
Cruising speed	160 km/h / 86.4 kts
Tank capacity	105 l / 27 US gal
Fuel consumption/h	15 l / 4 US gal

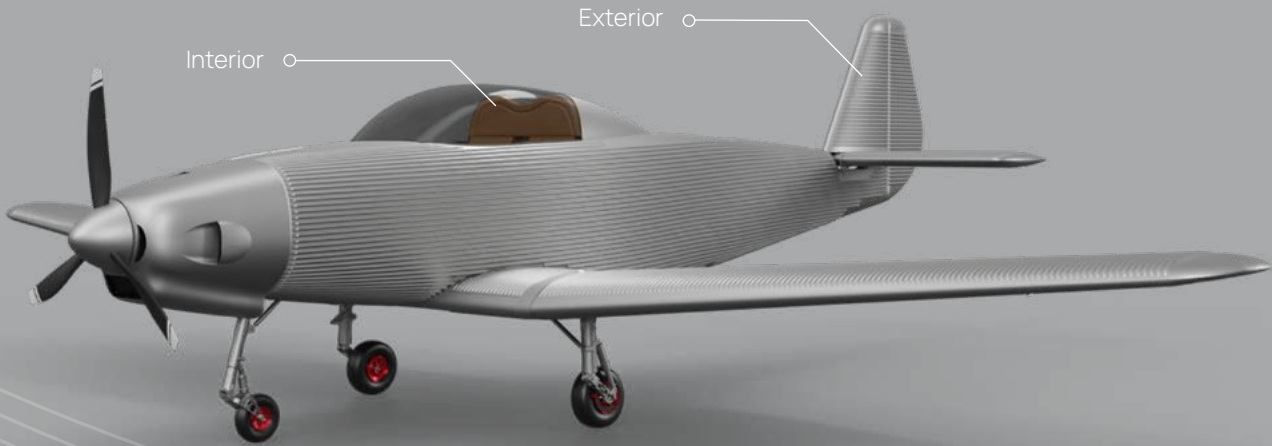

INDIVIDUALITY AS STANDARD

# DESIGN YOUR VERY OWN PERSONALISED A60

The individuality of the A60 is expressed in the choice of paintwork and interior trim. The six different paint finishes and leather colours can be combined as desired. Give free rein to your creativity.

# AN INGENUOUS DESIGN FOR A UNIQUE FLYING EXPERIENCE

With the new Junkers A60 light aircraft, the contemporary adaptation of this design icon is now taking off. Here, too, aesthetics and innovation are ideally combined. The characteristic duralumin corrugated metal panelling stylishly identifies the aircraft model as a member of the Junkers family.
